

## Development Services

We are the leading trusted experts to deliver analytics, project management, and lightning-based solutions on the Salesforce Platform.

### Our Solutions

**Custom Development** Whether you need help with a basic trigger or a completely custom app/community, we can leverage our extensive library of accelerators and AppExchange utilities to make your projects fast, high quality and pain-free.

#### **Lightning App Development & Conversion**

Let us help you get Lightning Ready and take advantage of all the new features Salesforce has to offer. We can design and build or convert your custom Lightning Apps and components for your apps.

#### **Salesforce Project Management**

**Implementation** Our consultants know how overwhelming it can be to navigate Salesforce. We have developed a project management platform native to Salesforce that will help take your organization to the next level.

#### **Training/Customization of Passage**

**Technology Apps** Need additional training or extend one of our apps? No problem, we provide training or can customize our applications to meet your needs.

**Data Migration** We offer data migration services so your valuable data can be transitioned from your old system into Salesforce with ease.

**Community Cloud Development** Salesforce Community Cloud allows you to connect with your customers, partners and employees on a whole new level. Our services can help you build a community to meet your needs and communicate like you've never done before.

#### **Analytics Cloud/Wave Cloud Apps &**

**Embedded Analytics** Quit slaving away over complex reports and allow us to create custom Visualforce pages or analytics components that allow you to easily see your information in a coherent manner. Reach out to us to learn which analytics tools you should be building with (e.g. Analytics cloud, Wave Cloud Apps, Rollup Helper, etc) - let us save you time, money, and sanity.
