Prioritization Helper

CAPABILITIES:

- 100% Salesforce Native, built with the Lightning Component Framework, while supporting both Salesforce Classic and Lightning Experience
- Collaborative decision making via the Analytical Hierarchy Process (AHP) to reduce cognitive biases
- Invite stakeholders who may or may not have access to Salesforce*
- Save evaluation result to Salesforce Files, or directly download the result as a PDF document
- Perform what-if analysis on evaluation results by excluding selected criteria
- View individual evaluation results
- Restrict participant's access with Apex Managed Sharing

USE CASES:

- Candidate evaluation from group interview
- Sponsoring or attending events
- Software purchase decision
- Risk assessment of data security

BENEFITS:

- Make quick yet scientific decisions for complicated scenarios in today's fast paced environment.
- Achieve group consensus for every decision made despite its degree of complexity.
- Hold participants accountable and have the peace of mind with archived decision results. Decisions are made and kept securely in your Salesforce organization without the hassle of external integrations.
